

It's time to focus on your Personal Leadership

Develop leadership capabilities and accelerate your impact as a leader with our Personal Leadership Program.

Strengthen your competence to lead in a changing world!

For more than 20 years, Acuity World has focused on creating value and sustainable performance through strengthening personal and social skills. We have trained several thousand people in both public organizations and private companies with significant results.

Effective leadership can have a significant impact on employee engagement, productivity, and retention, as well as overall organizational performance.

Take part in our ambitious Personal Leadership Program PLP™ I, if you want to accelerate your impact as a leader and achieve your goals.

This program is for you who wants to:

- Improve your personal leadership skills.
- Strengthen your ability as a leader to influence others through your communication.
- Attract and retain the right employees using sustainable performance strategies.
- Achieve better employee satisfaction.
- Build motivation and create energy in your organization.
- Learn how to incorporate a coaching approach into your leadership style.
- Sharpen your sensory acuity - and gain full access - also to non-verbal communication.

What you'll learn in this program?

In the program, you will be introduced to several leadership, communication, and coaching tools that will help you improve your performance as a leader.

You will develop the skills you need to be able to exploit your team's strengths and learn how to unfold the best potential in your employees. You will get concrete ideas and coaching tools for how you can help your team create the specific daily behavior that produces the results you want.

Your organization will get

- A leader who can enhance high-quality decision making.
- A leader who has learned Personal Leadership so that they make the right decisions and execute them faster.
- A Leader who engages each individual employee, at their best possible performance level.
- A leader who thinks and acts creatively when unforeseen events occur.

A year that develops and strengthens you

Leaders who create good results know how to combine high professionalism and organizational understanding with strong personal and social skills. In other words, successful leaders have the personal and social competencies to translate theoretical skills into practice and create results.

Our experience tells us that most leaders are skilled in the professional areas, while they often experience challenges in their personal and social skills. Our goal is that you, as a leader, obtain the personal and social skills you need to achieve your goals.

Network

The maximum number of participants for the training will be 20, as we make it a high priority that there is enough time for each participant.

You get to know your fellow students well during the program, and you get the opportunity to build strong professional networks consisting of leaders from various sectors.

Facilitators

Your teachers will be a team of highly certified Transformational Facilitators and Professional Coaches with broad practical and theoretical experience in leadership development.

You will learn from trainers with great insight into organizational management and over 25 years of experience.

The PLP™ program is designed for

- Leaders who want to achieve their goals by strengthening their leadership and management with concrete tools.
- Leaders who want to create growth through other people and create direction, team spirit, and results.
- Leaders who want to understand effective leadership and management approaches and/or who want to work more focused on personal and social skills.
- Leaders who want to be capable of guiding themselves and their teams in daily work but also through stressful and demanding situations.
